

Scatter plot showing Expected Calibration Error (ECE) for various models. The x-axis is labeled 'ece' and ranges from 0.0 to 1.0. The y-axis is unlabeled. The plot shows that most models have low ECE, with 'baseline:oracle' having the highest ECE (1.0) and 'baseline:baseline' having the lowest ECE (0.0). 'baseline:random' is at (0.5, 0.5).

| Model                                    | ECE (approx.) | Calibration (approx.) |
|------------------------------------------|---------------|-----------------------|
| baseline:oracle                          | 0.0           | 1.0                   |
| openrouter:google_gemini-3-flash-preview | 0.05          | 0.95                  |
| openrouter:openai_gpt-5-v3.2             | 0.08          | 0.92                  |
| openrouter:openai_gpt-5-nano             | 0.12          | 0.88                  |
| openrouter:google_gemini-3.1-flash-lite  | 0.15          | 0.85                  |
| openrouter:openai_gpt-5-nano             | 0.18          | 0.82                  |
| openrouter:meta-llama-4-scout            | 0.15          | 0.80                  |
| baseline:random                          | 0.5           | 0.5                   |
| baseline:baseline                        | 1.0           | 0.0                   |
